PROFESSIONAL SUMMARY

Computer Engineering graduate with hands-on experience across the full software development lifecycle using Agile workflows and Git/GitHub version control. Proven ability to build production-oriented full-stack applications using Next.js, TypeScript, Node.js, and MongoDB. Complemented by a strong foundation in embedded systems, AI-integrated hardware design, and network administration. Seeking an entry-level full-stack or software development role to deliver immediate engineering value.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, Java, C, PHP
Web & Software Development: Next.js, React.js, Node.js, Express.js, REST APIs, Authentication (JWT/Sessions), Tailwind CSS, HTML5, CSS3
Databases & Cloud: MongoDB, Mongoose, MySQL, Cloudinary
Engineering & Systems: Embedded Systems (Raspberry Pi, ESP32, Arduino), Computer Vision, Sensor Integration, Digital Logic, Networking (CCNA)
Systems & Networking: Linux (Ubuntu), Windows Server, pfSense, Tailscale, Routing & Switching, TCP/IP
Tools, Platforms & Practices: Git, GitHub, Vercel, Render, Postman, Figma, ClickUp, SDLC, Agile Methodology, Unit & Integration Testing (Jest, Vitest, Supertest), CI/CD

WORK EXPERIENCE

Full-Stack Developer Intern (OJT) — Jan 2026 – Mar 2026

Ordlabs / Encapoma Consumer Goods Retailing — Cagayan de Oro City, Philippines

- Collaborated within a 5-person agile team to build and maintain internal web applications following strict SDLC practices.
- Built the **App Release Management System (ARMS)**, a full-stack service using Next.js, Node.js, Express v5, and TypeScript, featuring automated validation via Zod.
- Applied CI/CD pipelines and unit/integration testing (Jest, Supertest) under senior developer guidance while participating in structured code reviews.
- Supported deployment and client troubleshooting to ensure high software quality and alignment with business criteria.

AI Data Annotation Contributor — Mar 2026 – Sep 2026

Remotasks — Cagayan de Oro City, Philippines

- Executed AI data annotation, text evaluation, and validation against strict guidelines, **sustaining a 90% task accuracy rate** across deliverables.
- Reviewed annotation outputs to identify and document dataset inconsistencies, directly supporting QA team reviews.

TECHNICAL EXPERIENCE

Networking & Systems Administration — Hands-On Technical Experience

Senior High School, TESDA Training, USTP — Cagayan de Oro City, Philippines

- **Network Deployment:** Configured, optimized, and secured enterprise networking environments utilizing Cisco routers, routing & switching protocols, and local network services.
- **Infrastructure Management:** Installed and deployed Windows Server, Linux (Ubuntu) operating systems, and Tailscale VPNs to establish secure, isolated communication across remote networks.
- **Security & Troubleshooting:** Programmed pfSense firewalls for network traffic control and diagnosed system connectivity flaws to restore functional hardware/software operations

PROJECTS

Progress — Full-Stack Project Management Platform

Full-Stack Project | Next.js, React, TypeScript, Node.js, Express.js, MongoDB, Zod, JWT, Vitest, Supertest

- Engineered a full-stack project tracker with task CRUD, granular search, status tracking, and multi-user collaborator assignments.
- Implemented secure JWT authentication with HTTP-only cookies, password hashing, email verification, and OAuth (GitHub, Google, Facebook), protected by role-based authorization, Zod validation, CORS, and rate limiting.

- Deployed the Next.js frontend on Vercel and the Express API on Render, using a rewrite proxy to keep auth cookies first-party across browsers, and fixed a production signup hang by moving blocked SMTP email to an async HTTPS API.
- Wrote 605 automated tests (unit, integration, API, E2E) across 53 files, achieving 91%+ statement and branch coverage.

App Release Management System (ARMS)

OJT Project — Next.js, TypeScript, Node.js, Express, Zod, Jest, Supertest, ESLint, Tailwind CSS

- Built a full-stack release management system to automate the company's website/application release process, applying SDLC practices from requirements through testing and maintenance.
- Implemented environment and DTO validation with Zod, automated API testing with Jest and Supertest, and user authentication/authorization for secure access control.
- Configured security middleware (Helmet, CORS) and request logging (Morgan), producing a scalable, well-documented codebase for future maintainers.

Q-Vision: Audio-Haptic Assistive Eyewear for Blind Individuals

Thesis Project (Co-Leader) | Raspberry Pi Zero 2W, GPT-4o mini, VL53L5CX sensors, Python

- Co-designed an AI-powered assistive wearable integrating cameras, distance sensors, and haptic feedback to provide multimodal environmental assistance.
- Integrated a Vision-Language Model (GPT-4o mini) with computer vision and text-to-speech, scoring 89.53% object recognition accuracy.
- Multiplexed distance sensors via I^2C to capture obstacle proximity, hitting a 923.57ms average haptic response time for real-time hazard alerts.
- Conducted field usability testing with visually impaired participants, securing a 74.4 System Usability Scale (SUS) "Good" rating.

Digital Banking Kiosk

Embedded Systems Project (Leader) | Raspberry Pi 4, Python-Django

- Led end-to-end assembly of a self-service banking kiosk prototype integrating a touchscreen display, bill acceptor, and biometric fingerprint sensor.
- Designed and built secure transaction workflows and UI screens inside Python-Django to simulate authentic commercial banking events.

MediTrack Inventory

Microprocessor Project (Leader) | ESP32, Arduino Uno, MySQL, PHP, HTML/CSS/JS

- Developed an embedded inventory tracking system using ultrasonic sensors and LCD outputs to monitor medical supplement counts in storage units.
- Programmed threshold trigger alerts that automatically pushed real-time notifications when inventory counts dropped below critical bounds.

EDUCATION

Bachelor of Science in Computer Engineering | *University of Science and Technology of Southern Philippines (USTP)*
Graduation: 2026 | Cagayan de Oro City, Philippines

- ***Relevant Coursework:*** *Data Structures & Algorithms, Computer Architecture, Embedded Systems, Software Engineering, Database Systems, Networking.*

CERTIFICATION

EF SET English Certificate (C2 Proficient) — *EF Standard English Test, 2026*

Cisco Networking Academy Certifications (2025):

- *CCNA: Enterprise Networking, Security, and Automation*
- *CCNA: Switching, Routing, and Wireless Essentials*
- *Networking Essentials & Introduction to Cybersecurity*

EXTRACURRICULAR ACTIVITIES

Student-Athlete — University Sepak Takraw Team | *USTP* *2022 – 2026*

- Awarded the **Outstanding Student-Athlete Award (2026)**, ranking 1st out of 250 varsity student-athletes.
- Earned the **Role Model Athlete Award (2025)** for demonstrating excellent performance and high academic standing over a 4-year varsity career.
